Atlanta, GA · Open to remote / async

Honors

Texas A&M all-time leading scorer
NCAA Division I women's basketball

SEC Legend · Class of 2019
Southeastern Conference women's basketball

Skills

FRAMEWORKS

React · Angular 4/8+ · TypeScript · JavaScript ES6+ · HTML5 · CSS3 / SCSS · Responsive

DESIGN SYSTEMS

Component libraries · Design tokens · Theming · Angular Material · PrimeNG · PrimeReact · MUI · shadcn/ui · Bootstrap · NG-Bootstrap

DATA & APIS

GraphQL · REST · BFF · PostgreSQL · Postman

ACCESSIBILITY

Section 508 · WCAG · Screen readers · High contrast

TESTING

Playwright · Vitest · Selenium · Jest · Jasmine / Karma · JUnit / Mockito

AI-ASSISTED DEV

Claude Code · Cursor · GitHub Copilot · Amazon Q

Summary

Senior frontend engineer with **7+ years** building production web apps for Fortune 500 and federal / public-sector clients. I **build and implement design systems** and ship the product features that run on them, in React, Angular and TypeScript, with **Section 508 / WCAG** accessibility and automated testing built in. Hands-on with **AI-assisted development** on commercial projects (Claude Code, Cursor, GitHub Copilot, Amazon Q). Former NCAA Division I athlete who brings discipline, coachability and composure under pressure to cross-functional teams.

Experience

Software Engineer, Engineering Consultant · Slalom Consulting

Jul 2022 – Oct 2026

Front-end delivery across enterprise and public-sector programs from 100+ person teams to solo builds. Usually there was no design system to inherit, so I built and evolved the component library alongside the product.

Aviation weather & dispatch platform REACT · AWS

- Built reusable React components and feature UI for the platform airline dispatchers use to track aircraft, monitor conditions and communicate with pilots, translating wireframes into production interfaces.
- After an acquisition, helped migrate the product off the former parent's design system onto a new standalone component library.

Healthcare research platform SOLE FRONTEND ENGINEER

- Built the design system and every component from scratch, then the entire frontend on top of it, consuming the team's GraphQL APIs.
- Delivered AI-first with Claude Code across design, build and testing.

Enterprise healthcare organization FEATURE POD

- One of 7–8 feature teams building on an established enterprise design system; extended it with new components and patterns when product features outgrew it, instead of one-off workarounds.

Statewide judicial system modernization REACT · BFF

- Delivered React features and contributed to the Backend-for-Frontend layer, aggregating and transforming multiple APIs into UI-ready responses to reduce front-end complexity and improve performance.

Federal education, student tuition services ANGULAR · SPRING BOOT · AWS

- Contributed to a federal microservices platform unifying 12 student-facing grant and loan applications; part of the agile team that shipped 9 full feature releases over ~3 years with real-time release support.

At a glance

7+ years
production frontend

10+ client projects
aviation, healthcare, government, education, retail

8 design systems
built or extended on the job

Millions of users
on a federal student-aid site I helped rebuild

Skills (cont.)

CLOUD & DELIVERY

AWS EC2 / RDS · Cloudflare Workers · Jenkins · CI/CD · Git · Agile / Scrum · Jira

ALSO

Java · Spring Boot / MVC · Adobe Campaign · Square APIs · Apps Script

Education

Texas A&M University
B.S., Computer Science & Engineering
2012 – 2018

NCAA D-I Women's Basketball · Student-Athlete Advisory Committee representative

Experience (continued)

Slalom Consulting · continued — 2022 – 2026

National quick-service restaurant brand AI-FIRST DELIVERY

- Delivered frontend features with AI coding tools (Cursor) from day one and helped fold them into the team's daily workflow.

- Wrote automated end-to-end and component tests with **Playwright** and **Vitest** across multiple products, running in CI pipelines.
- Used Claude Code, Cursor, GitHub Copilot and Amazon Q at the enterprise level and helped teams adopt them.

Senior Software Developer · Accenture Federal Services — May 2019 – Jul 2022

- **Lead developer** on the agile team rebuilding StudentLoans.gov, a federal web application serving millions of borrowers.
- Implemented **Section 508 / WCAG** accessibility throughout the rebuild (screen reader support, color contrast, high-contrast display) so blind and low-vision borrowers could use the site and it met federal compliance.
- Cross-trained with the testing teams; wrote **Selenium** tests, including accessibility checks, that ran in CI before every release.
- Helped build and maintain the shared UI component library as the design system evolved; built UI in Angular 4/8, HTML5, CSS3 and NG-Bootstrap with go-live support.
- Final 6 months on the Adobe Campaign team, building and testing email campaign environments for the same program.

Software Developer · Revature (Advanced Training Program) — Jan 2019 – May 2019

- Intensive corporate-sponsored full-stack program: redesigned UI/UX with HTML5, CSS3 and NG-Bootstrap; added Jasmine / Karma tests; built a CI/CD pipeline (GitHub, Jenkins, AWS EC2 / RDS) with OWASP ZAP security scanning.

Independent work

Walker & Wood Furniture Co.
Co-owner & engineer · 2026 – present
Shop, rental quote builder and iPad ops app for our furniture flipping + event rental business: Square APIs, Cloudflare Workers, Google Apps Script, PWA, signed PDF hand-offs.

Cuewise
Founder · in progress
AI study app: upload slides, PDFs or lecture audio and get cue cards, notes and group study modes. Planned: React / TypeScript PWA, Claude API, spaced repetition.

Portfolio with live, switchable UI kits: link on LinkedIn.
